

## ORGANIZATION OF INCREASING THE EFFICIENCY OF SPIRITUAL EDUCATIONAL WORK IN MILITARY SERVANTS

Kamolov Orif Yakibovich

Senior Lecturer, Military Security and Defense University of the Republic of Uzbekistan

**Abstract:** The article is devoted to the upbringing of highly professional, devoted to their military and patriotic duty, selfless and courageous military personnel, and the content of the organization of increasing the effectiveness of spiritual and educational work among military personnel is substantiated.

**Keywords:** professional, military personnel, military and patriotic, spiritual and educational, effectiveness, upbringing.

The upbringing of highly professional, devoted to military and patriotic duty, selfless and courageous military personnel is one of the most important conditions for protecting the independence and territorial integrity of the Republic of Uzbekistan.

In recent years, extensive work has been carried out to consistently reform and develop the national army, strengthen the defense capabilities of our state, and train military personnel.

The adoption of the concept of educating youth in a military-patriotic spirit, and the strengthening of cooperation with local government bodies to ensure the unity of the army and the people make it possible to replenish the ranks of our national army with young people with a strong will and an active civic position.

Also, in accordance with the Resolution of the President of the Republic of Uzbekistan No. PQ-3898 dated August 4, 2018 “On radically improving the system of improving the spiritual and educational level of military personnel of the Armed Forces of the Republic of Uzbekistan”, a clear system has been created for the effective organization of spiritual and educational work in the Armed Forces of the Republic of Uzbekistan.

Spiritual and educational work is a purposeful and systematic activity carried out by military management bodies to positively influence the consciousness, thinking and will of military personnel in order to form high spiritual, moral, combat and spiritual qualities, to strengthen their ideological immunity against foreign ideas.

Spirituality is an incomparable force that encourages a person to spiritual purification, to grow in spirit, to strengthen the inner world of a person, his will, to make his faith whole, to awaken his conscience, and is the criterion of all his views.

Enlightenment is an educational process aimed at increasing the consciousness, knowledge, and culture of people. Enlightenment as a term means a complex of various knowledge and information about nature, society, and the essence of man.

The factors that require further improvement of spiritual and educational work are:

the increasing demands on the professional qualifications, combat and moral-spiritual training, spiritual and moral, spiritual and combat qualities of military personnel during the development of forms and methods of armed struggle;

the struggle of various ideologies and ideas in the international arena, the intensification of attempts to influence the spiritual and moral foundations of our national army through informational and psychological attacks;

the increasing number of attempts to instill destructive ideas and concepts that are completely contrary to our culture, spiritual values and traditions into the minds of military personnel through the widespread use of modern information technologies;

the urgent importance of strengthening the spiritual foundations of our independence, preserving our national values, traditions and customs, and deeply instilling feelings of love for our Motherland and loyalty to independence in the hearts and minds of military personnel.

In order to turn spiritual and educational work into a powerful and invincible force, it is first of all necessary to be able to find a way to the heart of a military personnel.

If a way cannot be found to the heart of a military personnel, any information and concepts conveyed to him will remain superficial. Therefore, in order to carry out systematic and continuous work in this regard and achieve the intended goal, it is necessary, first of all, to start work by finding a way to the human heart.

It is necessary to further strengthen and raise to a new level all areas that directly affect the soul and thinking of a military serviceman, including educational, ideological, educational and cultural work, based on the requirements of the time. Spiritual and educational work is one of the components of the work carried out with the personnel of the troops of the Ministry of Defense and is one of the main areas of ideological, spiritual, educational and cultural education of military personnel.

In the conditions of globalization, there is a powerful tool that strengthens the strength of the army and becomes a decisive factor when the time comes - the spiritual and spiritual preparation of military personnel, their strong will, active life position, and most importantly, their deep understanding and understanding of who and why they are performing their military duty.

Therefore, spiritual and educational work is a powerful tool that ensures the combat readiness of the troops and the moral and spiritual stability of the personnel, forms the spiritual and moral qualities of military personnel, a sense of patriotism, a sense of military duty and personal responsibility, and professional skills.

The primary goal of spiritual and educational work is to form the spirituality of

a free person with a strong will and a strong faith. That is, to educate a well-rounded person - a defender of the Motherland - a person with an independent worldview, living on the invaluable heritage of our ancestors and modern thinking.

The main goals of spiritual and educational work are:

to form high patriotism and spiritual and moral qualities in military personnel, to strengthen their active life position and firm faith, responsibility for the fate of the Motherland;

to form ideological immunity in military personnel against ideological pressure and informational and psychological attacks aimed at influencing our country, in particular, the spiritual and moral foundation of our national army;

to mobilize military personnel to be spiritually awake and alert, to feel the responsibility entrusted to them, to be always alert and vigilant, and to selflessly fulfill their service and combat duties.

Within the framework of a unified system for increasing the effectiveness of spiritual and educational work, it is organized under the leadership of commanders and chiefs in the daily combat and service activities of military units and institutions, as well as directly carried out by educational and ideological work bodies.

For commanders at all levels: “Where negligence and indifference prevail, where the most urgent issues are left to selfishness, there spirituality becomes the weakest and most vulnerable point. And vice versa - where vigilance and enthusiasm, high intelligence and thinking prevail, there spirituality becomes a powerful force,” should be a program of truth.

Based on studying the historical roots of our national heritage, widely promoting the exemplary lives of our great ancestors and brave contemporaries who showed heroism in the cause of the freedom of the Motherland, military personnel should be instilled with the motto “The people of Uzbekistan will never depend on anyone!” It is necessary to establish a vital belief that.

By deeply revealing the true meaning of religion, it is necessary to instill in military personnel the traditions of goodness and compassion, to form humane and benevolent relations, and to educate them on the basis of respect and reverence for our national culture and values, selflessness and loyalty, honesty and purity, independent thought and a healthy lifestyle.

To expose the ideological and informational-psychological attacks directed against our country, the malicious goals of the destructive forces behind them, and to rid the minds and hearts of military personnel of such vices as negligence, indifference, selfishness and ideological instability.

As spiritual and educational work is properly carried out in military units and institutions with a clear goal, the worldview, patriotic feeling, socio-political

knowledge and active life position of military personnel will be developed. increases. This, in turn, leads to strengthening military discipline in units and divisions, preventing violations, and improving the spiritual and moral environment.

It is very important that spiritual and educational work is understood in a simple, concise and fluent manner, that it is vital and figurative, creatively approached, and free from formalism.

To convey to military personnel in a comprehensive manner that the path of development chosen by Uzbekistan is the right and vital path in all respects, the essence and significance of the achievements and milestones our country is achieving in building a new democratic state and civil society, to ensure their deep understanding of the value of our independence, to promote and comprehensively explain the content and essence of the political, economic, legal, military and spiritual reforms being implemented in our country, and the legal and regulatory documents being adopted, to instill in military personnel boundless loyalty to our country, love for the homeland, a free and prosperous It consists of educating military personnel in the spirit of faith, courage and dedication to the great and noble goal of building a great future state, the homeland, and conveying to them and explaining in depth the military-political situation in the world and the region and its future development trends, the place and role of Uzbekistan in the world community, and the essence of the main directions of its foreign policy activities.
